Subject: TSCA reporting for WV-update

Priscilla – see below for what went today to Greg Dotson of Waxman’s HEC min staff. It’s pulled from Tracy Williamson’s longer fact sheet. In addition, Jerry Couri of majority staff asked last week whether MCHM and PPH were new or old chems and subject to TSCA section 5 – we gave a quick response that they were grandfathered in the original inventory. Please let me know if any additional questions. Thanks,

Sven

· Under the TSCA Chemical Data Reporting Rule, EPA received chemical data reporting for propylene glycol phenyl ether, or PPH, although none of the submitted information was claimed to be confidential business information (CBI). EPA also has toxicity data on this chemical because it was subject to the OECD Screening Information Data Set (SIDS) program.

· **MCHM** (CASRN 34885-03-5, “4-methylcyclohexanemethanol”)

- Put on original TSCA Inventory

- 1 public CDR report from Eastman Chemical
